

## SmartPayments™ Payment Server Electronic Payment Processing Software Pricing

SmartPayments™ Payment Server comes in two editions: Standard Edition and Enterprise Edition. The Standard Edition is recommended for those who have only one merchant account (commonly used as an in-store controller).

For pricing on SmartPayments™ Client, Mobile and QuickBooks or RMS Plug-ins, or if you have any questions, [please contact us!](#)

### Notes for SmartPayments™ Payment Server:

- SmartPayments™ Payment Server (Standard, Professional or Enterprise Edition) does not limit the number of connections or threads. However, since Standard and Professional Edition can only be installed on a single CPU server, there will be physical limitations based on your network and hardware configuration. If this is an issue, consider the Enterprise Edition which you can scale on multiple servers and networks.
- Standard & Professional Edition supports a maximum of 5 Merchant ID's. If you need more than 5 Merchant ID's, Enterprise Edition is required.
- SmartPayments™ Payment Server (Standard, Professional or Enterprise Edition) includes 30 days of free installation telephone and email support from date of registration and 11 months of free email support. After the initial 30 days from date of activation, Standard and Professional Edition telephone support will be billed at \$49 per incident. Enterprise Edition telephone support will be billed at \$79 per incident.
- Annual support contracts are available for Professional Edition and Enterprise Edition at 20% of the total license price for Enterprise Edition.
- Prior to installation, server hardware should be approved by Hypercom Payment Solutions.
- A license is made up of all base and desired add-on components. Standard, Professional and Enterprise Editions are licensed per server/CPU.
- Prices listed on this page and the associated PDF documents are subject to change. For an accurate quote, please [contact us](#).

### Notes for SmartPayments™ Client:

- Smart Payment Client with or without the RMS/Quick Books plug-in, includes 30 days of free installation telephone and email support from date of registration and 11 months of free email support. After the initial 30 days from date of registration telephone support will be billed at \$39 per incident. At the end of the first year, the merchant or reseller can elect to pay \$99 per location for another year of unlimited telephone and email support. Client updates to new releases/versions are \$99 per location/store. Without an Annual Support Agreement, telephone support for the Client will continue to be \$39 per incident.
